RT SERIES – ULTIMATE POWER TO WEIGHT TORQUE SOLUTIONS

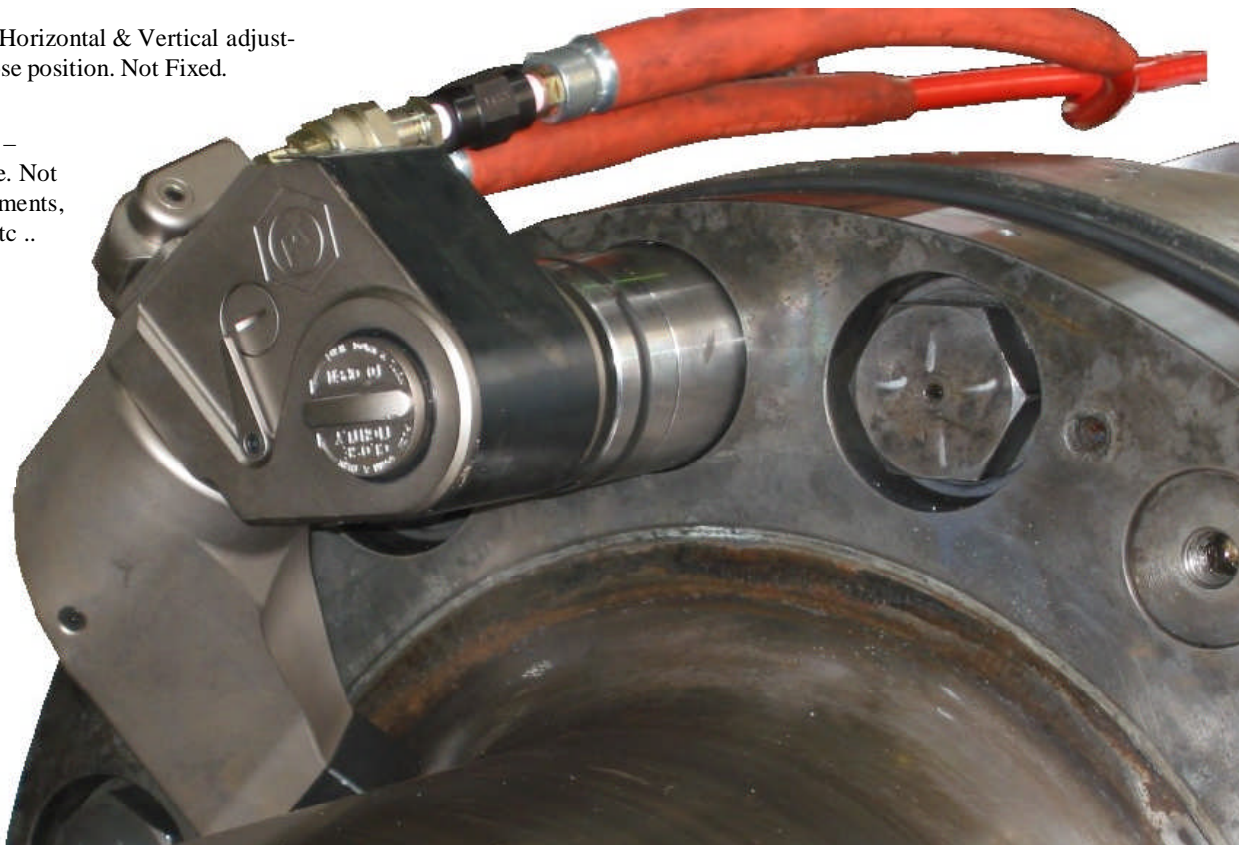

Hose Swivel – Horizontal & Vertical adjustment. Safest hose position. Not Fixed.

Reaction Arm – Fully adjustable. Not Fixed. 6° Increments, Deep Sockets etc ..

Course Tooth Ratchet – Proven necessity. Reliable ratchet tooth engagement.

Light Weight Air Craft Alloy – not steel, weight does matter.

Power To Weight – Nothing Compares

RT SERIES – Dedicated square & hex drive, hydraulic torque wrench, for use with Impact Sockets. These tools are designed for serious heavy industry users. Fully adjustable reaction for maximum reaction options. Rapidtorc's aim is not to limit tool usability, but increase it. The Rapidtorc RT torque wrenches have evolved over 25 years using hands on industry knowledge. Proven design, tough, reliable & well backed. Smallest, lightest most powerful torque tool option in the world. Australian South Pacific Supported. When it needs to fit – Rapid-Torc is the answer
